PROFILE

Motivated and detail-oriented IT student with a strong foundation in programming, web technologies, and database management. Eager to apply technical knowledge in a real-world environment while continuously learning new technologies. Possess strong problem-solving skills, a positive attitude, and the ability to work effectively in a team.

TECHNICAL SKILLS

Python
Machine learning
Data science

PROJECTS

Movie recommendation model

Developed a Movie Recommendation System using Machine Learning techniques and a small dataset sourced from Kaggle. The model analyzes user preferences and movie features to provide personalized movie suggestions. Implemented data preprocessing, feature selection, similarity algorithms, and performance evaluation to ensure accurate recommendations. This project strengthened my skills in data analysis, Python, and machine learning concepts.

Stock price prediction model

Built a Machine Learning–based Stock Price Prediction System using historical stock data from Yahoo Finance. Applied data cleaning, normalization, and supervised learning algorithms to predict future stock prices. Evaluated model performance using error metrics to improve prediction accuracy.

Object detection model

Designed and implemented a real-time Object Detection and Counting System using OpenCV and camera-based video input. The system detects objects such as people and vehicles, counts them, and stores the captured data for traffic monitoring and surveillance analysis. The project includes live data capture, detection, tracking, and report generation features.

Sports equipments

This project is offline project .This is a e-commerce project
Technologies like PHP, HTML, CSS, JavaScript, Bootstrap have been used in this project.
HTML, CSS, JavaScript have been used for the frontend and PHP has been used for the backend.

Beauty & perfumes

This project is also an offline project and also e-commerce project
Technologies like ASP.NET, HTML, CSS, JavaScript, Bootstrap have been used in this project.
ASP.NET has been used for the backend.

EDUCATION & CERTIFICATIONS

Bachelor of computer application

C.U.shah college of commerce and computer education

Udemy

AI & Machine learning ,Data science
